

## **Cyngor Cymuned Llanystumdwy Environmental Policy**

**Cyngor Cymuned Llanystumdwy** acknowledges its role and responsibility in the protection and enhancement of the environment. We acknowledge that acting on a local level brings global benefit by protecting the environment and its resources for future generations.

We will review our services to ensure:

That negative impacts are managed, minimised or eradicated.

That our activities conform with environmental regulations and legislation.

In order to achieve these objectives, this policy includes our response to the following environmental issues:

### Waste Management

Reducing, re-using or recycling waste while ensuring that all waste produced by our activities is stored, handled, transported and disposed of safely.

### Pollution Control

Implementing measures to reduce the effects of releases to air, water or land as a result of our activities.

### Energy and Resource Management

Implementing measures for the management of energy and resources, based on the monitoring of use, energy-efficient design, and conservation.

### Purchasing

When requesting a quotation, the promotion of sustainability considerations as a basis for purchasing decisions. Selecting suppliers and contractors based on their attitudes to environmental issues. Working together with suppliers to promote improvements in their environmental performance.

Adopted: July 2014.

The Environmental Policy will be updated every four years, or sooner as a result of new regulations or a change in legislation. A majority of two thirds of all Councillors will be required in order to amend the Environmental Policy.
